

Description and Location of Proposed Flood Control Works, per IC 36-7-15.6-9(c)

Alternative 3 of the Geotechnical Evaluation and Alternative Development – Rocky Ripple Local Flood Damage Reduction Project (LD-10-006) completed July 2018 for the City of Indianapolis Department of Public Works describes and illustrates the location of the proposed flood control works. The proposed flood control works include earthen levee beginning along the west bank of the water supply at approximately the intersection of Westfield Boulevard and Capitol Avenue. The proposed flood control works extend south along the east bank of the West Fork of the White River as a combination of reconstructed earthen levee and new flood wall. At about the intersection of 51st Street and Riverview Drive the proposed flood control works will be reconstructed earthen levee extending along the river to acceptable high ground elevation approximately 850 north of the intersection of 44th Street and Haughey Avenue.

PROJECT DESCRIPTION
 1. ALTERNATIVE 3 IS A COMBINATION OF EARTHEN LEVEE, T-WALL AND I-WALL.

REAL ESTATE IMPACTS

ITEM	QUANTITY	UNIT
HOUSES NOT PROTECTED	9	EA
RELOCATE HOUSE	0	EA
RELOCATE SHED	6	EA
OCCUPIED PARCELS IMPACTED	58	EA
VACANT PARCELS IMPACTED	31	EA
CITY PARCELS	4	EA
PARCELS NOT IMPACTED	35	EA

PROJECT FEATURES

COMPACTED EMBANKMENT	162,700	CY
EXCAVATION	93,300	CY
EARTHEN LEVEE	5,020	LF
COMBI WALL	0	LF
T-WALL	1,062	LF
I-WALL	3,468	LF

* DOES NOT INCLUDE MISCELLANEOUS SITUATION SUCH AS FINISH, PATIOS, SET BACKS, WALLS, ETC.

- LEGEND**
- HOUSES REMAIN OUTSIDE OF LEVEE
 - RELOCATE HOUSE OR SHED
 - OCCUPIED PARCELS IMPACTED
 - VACANT PARCELS IMPACTED
 - LEVEE / EMBANKMENT FILL
 - COMBI WALL
 - T-WALL
 - I-WALL
